PROFESSIONAL SUMMARY

Aspiring Backend Developer and B.E Computer Science Engineering student with strong problem-solving and analytical skills. Passionate about designing scalable and efficient backend systems using Java, REST APIs, databases, and modern development practices. Experienced in developing project-based solutions involving data management, system integration, and full-stack application development. Eager to contribute to real-world software engineering challenges while continuously expanding expertise in backend technologies and intelligent systems.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, JavaScript

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap

Backend Technologies: Java Servlets, JSP, RESTful APIs, FastAPI

Databases: MySQL, MongoDB

Tools & Software: Git, GitHub, IntelliJ IDEA, Visual Studio Code, Figma

AI/ML Technologies: scikit-learn (Basics)

ACADEMIC PROJECTS

Project 1: Personal Finance Tracker with Real-time Budget Management

Stack: Java, JSP, Servlets, MongoDB Atlas, HTML, CSS, JavaScript, Bootstrap 5

- Developed a full-stack web application enabling users to track income, expenses, and manage customizable budgets with real-time balance calculations and visual progress indicators.
- Implemented secure user authentication with session management, CSRF token validation, and input sanitization to protect against web vulnerabilities.
- Designed MongoDB Atlas cloud database with optimized aggregation pipelines for real-time financial analytics and built a responsive AJAX-powered dashboard for live data updates.

Project 2: AI-Based Vehicle Telemetry Alert & Fault Detection System

Stack: HTML, CSS, JavaScript, Python, FastAPI, Streamlit, Scikit-learn

- Developed a real-time vehicle telemetry monitoring system to process sensor data such as speed, RPM, engine temperature, and battery voltage.
- Implemented rule-based and anomaly detection techniques to identify faults and generate intelligent alerts.
- Built a live dashboard for visualizing telemetry data, vehicle health status, and fault alerts in real time.

CERTIFICATIONS

Certification in Python Foundation Course - Infosys Springboard.

Data Science for Engineer— NPTEL

Certification in Salesforce Administrator Explorer — SSC NASSCOM

EDUCATION

B.E V.S.B. Engineering College (currently in 2nd Year) | 9.32

2024 – 2028

12th Grade — The Akshaya Academy Campus, CBSE Senior Secondary School | 80.2 %

2023 – 2024

10th Grade — The Akshaya Academy Campus, CBSE Senior Secondary School | 91 %

2021 – 2022
